Samaneh Heshmatzadeh *Software Developer | Full Stack Developer*

Coquitlam, BC 604-704-8836 sama.heshmatzadeh@gmail.com heshmatzadeh

PROFILE

Software Developer with 2+ years of experience building and supporting web applications, REST APIs, and database driven systems. Experienced across the software development lifecycle, including requirements, implementation, testing, debugging, deployment, and maintenance. Strong engineering and problem-solving background with hands-on experience across frontend, backend, databases, cloud services, and system integrations.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, TypeScript, SQL
Backend & APIs: Django, ASP.NET Core, Node.js, Express.js, REST APIs, Third-Party API Integration
Databases: PostgreSQL, MySQL, MongoDB, Supabase, AWS Keyspaces, Relational Database Design
Frontend: React, Next.js, Angular, HTML, Tailwind CSS, D3.js, Chart.js
Cloud & DevOps: AWS, Git, GitHub, Vercel, Heroku
Development: Authentication & Authorization, Testing, Debugging, Agile, AI Integration

WORK EXPERIENCE

Full Stack Software Developer, *Sparkbridge* Mar 2025 – Present | Vancouver

- Develop and maintain customer-facing full-stack web applications, translating product and business requirements into production-ready features across frontend, backend, APIs, and databases.
- Build responsive frontend features using React, Next.js, and TypeScript, including onboarding flows, dashboards, forms, data management interfaces, and reusable components.
- Develop backend functionality using Python and Django, PostgreSQL, Supabase, and REST APIs, including database models, business logic, authentication, and system integrations.
- Integrate AI-powered functionality into application workflows to process user-provided data and generate structured outputs and recommendations while validating results and handling errors.
- Diagnose frontend, backend, API, authentication, and database issues through structured debugging, log inspection, data validation, and targeted testing.
- Contribute across the software development lifecycle, including implementation, code reviews, Git workflows, testing, CI/CD, deployment, troubleshooting, and ongoing product enhancements.

Software Developer Intern, *PDF Solutions* Apr 2024 – May 2024 | Vancouver

- Developed Angular front-end applications and .NET Core Web APIs for semiconductor manufacturing analytics.
- Designed RESTful services to retrieve, transform, and process large-scale datasets for analytics applications.
- Integrated AWS Keyspaces with .NET services and built interactive D3.js visualizations for defect analysis.
- Implemented Google Protocol Buffers to improve communication efficiency between Angular and .NET applications.

Junior Software Developer, *Pellonia* Feb 2023 – Aug 2023 | Vancouver

- Developed and maintained reusable React components for a customer-facing anti-piracy SaaS dashboard.
- Integrated frontend functionality with REST APIs to retrieve and display application data, improving usability.
- Investigated bugs, supported releases, and collaborated through Git-based development workflows and ongoing application improvements.

PROJECT EXPERIENCE

Sips Cafe - Full Stack Ordering and Administrative Platform, *BCIT Project* Nov 2023 – Feb 2024

- Developed a full stack platform using ASP.NET Core, C#, and Azure SQL while following Agile development practices.
- Implemented authentication and authorization using ASP.NET Identity, Google reCAPTCHA, and email verification.
- Built REST APIs and relational database structures while applying data privacy and application security practices.

EDUCATION

Software Systems Developer Certificate, *British Columbia Institute of Technology - BCIT* May 2024 | Vancouver

Bachelor of Science in Electrical Engineering, *Amirkabir University of Technology* Tehran, Iran
